Finkelstein Metals REACH and LCP Declaration

Finkelstein Metals Ltd. is a manufacturer of continuous cast alloys and extrusion alloys. The company established outside the EU, therefore not bound by the obligations of REACH, even if you export their products into the customs territory of the European Union.

As the company's articles do not contain substances that are intended to be released under normal or reasonably foreseeable conditions of use, these articles are not subjected to the registration obligation (alloys are considered as "special preparation" and therefore not subjected to registration and evaluation under REACH at their solid state²).

Finkelstein Metals is aware of the notification requirement and comply with the regulation, the company identify and manage the risks linked to the substances they manufacture and market in the EU
